

Web Bomic

Leading the way in Substance Misuse computing

The highly configurable web based application that provides for all your standard, clinical, administration, communication and reporting requirements.

- **Comprehensive**

The Web Bomic core system provides for all your administration, communication and reporting needs.

- **Expandable**

Additional modules can be included as and when required.

- **Continually evolving**

Web Bomic never becomes outdated, as upgrades are made available when additional functionality is developed and following changes to statutory reporting requirements.

- **Developed by 6PM**

The market-leading provider with over 10 years experience in developing and delivering Substance Misuse software solutions.

The Core System

Web Bomic has been designed to meet the needs of a wide range of services involved with the treatment and care of people with addictive disorders, including drugs and alcohol.

A highly configurable web based software application, Web Bomic has been developed in line with Microsoft's best standards and practices.

Full client record

With a full record of all required client data, Web Bomic gives you the reassurance that information can be recorded, retrieved and reported with ease.

Comprehensive client communication

Web Bomic offers a range of easy ways to contact large numbers of clients utilising the in-built mail merge facility, direct client email and the optional SMS Text Messaging Module.

NDTMS compatible

By eliminating manual data collation Web Bomic not only saves you time each month but also produces accurate, duplicate-free data for NDTMS submission at the touch of a button.

Flexible report generation

Simple, quick access to all your data. Includes an inbuilt bank of standard reports and an advanced reporting tool which enables the user to extract information in multiple formats.

Fully scalable system

Web Bomic operates efficiently, irrespective of the number of users, at a single site, or as a region wide solution.

Enhanced security technology

Web Bomic gives you the reassurance that all sensitive data is protected and safeguarded, with full administrator control of user access levels and privileges.

Tailored to Meet your Specific Needs

Web Bomic is a fully customisable software application and at 6PM we appreciate that services delivering different types of treatment have different requirements. We make the system as cost-effective as possible by letting you, the customer, decide which additional modules are needed. You only pay for functions that are required.

Additional Modules:

Prescribing Module

- Developed specifically to meet the needs of Substance Misuse prescribing. Includes Methadone maintenance & reduction regimes and Buprenorphine plans.
- Accurate, automated generation of prescriptions with full script history in an easy to view format reducing the burden on busy treatment services.
- Pre-populated with standard remarks. In addition, functionality allows users to populate scripts with free text remarks.
- Dispensing schedules provide the user complete control over pick up days.
- Bulk/ Batch-printing facility.

Needle Exchange Module

- Full client record of all needle exchange activity enables compliance monitoring and trend analysis.
- All Needle Exchanges recorded and presented in an easy to view format.
- Onward Referral History.
- Inbuilt reporting options for simple and speedy reporting on Issues and Returns.

Drug Intervention Programme (DIP) Module

- Collect and report on all DIP activity including full detailed Care Plans and Caseload Management.
- Print function allows you to print completed DIR forms on Home Office Templates.
- Microsoft Excel (XML) download/ export function.
- Generate the DIP extract for the DIRWeb upload at the touch of a button.
- Advanced (preset) reporting allows you to report on any DIP information on the system.

Family & Carers Module

- Capture full client Referral and Event History.
- Create, monitor and maintain Care Plan Records.
- Link GP and other Professionals to specific clients using information provided from the NHS Directory.
- Capture Group Work Session information.
- Inbuilt reporting options with predefined reporting logic for ease of use.

SMS Text Messaging Module

- SMS Text Messaging Module.
- Send individual SMS Text Messages to specific clients.
- Send bulk SMS Text Messages to clients with appointments.
- Create predefined SMS Text Message templates or use free text to create your own individual message.
- Run predefined reports on SMS Text Messages sent.
- Update your SMS Text Message credits automatically through a link on the Web Bomic System.

Quality Statement

6PM implements a Business Management System which encompasses all company operations and has been certified as meeting the requirements of ISO 9001:2000.

We have been accredited with N3 Commercial Third Party Connection Status, for remote connection to NHS customers, enabling us to offer prompt support and software upgrades. At your request, we can connect to your system and investigate any technical problems in a timely and cost-effective manner.

We are a member of FAST Corporate Services and maintain compliance with the FAST Standard for Software Compliance FSSC-1:2007.

Our project leaders are trained and qualified in PRINCE 2 project management, and all implementations planned by 6PM Blithe adhere to PRINCE 2 methodology.
