

Analytics for iAssets

Real-time graphical analytics for hospital logistics management

Analytics for iAssets is a powerful data management engine that automatically receives and processes data from the iFIT database.

The solution produces ad-hoc reports and highly configurable graphical charts that allow managers and clinicians to manage the delivery of their services more effectively. The data is reconstituted in a way that makes it simple for non-technical users to use and build customised reports or dashboards.

Analytics for iAssets comes with an out-of-the-box dashboard, tailor-made for the basic functionalities of Idox Health's iAssets solution. The end result is instantly accessible, real-time data for the executive team and information analysts to use.

Analytics for iAssets is the next natural step in deriving value from your iFIT deployment by providing an easy to configure and highly visual interface to present process information that is accurate, consistent and complete.

Some chart views:

Utilisation value for an asset type.

Utilisation value for specific assets pertaining to an asset type.

The number of assets corresponding to status by asset type.

Top 10 benefits of Analytics for iAssets

If you're looking for further insights into the performance of your service, Idox Health's Analytics is the perfect solution to complement your iFIT implementation.

- » Instant visibility of datasets which can be made available on demand.
- » Highly comprehensive accurate and flexible reporting.
- » Reach different stakeholders within the organisation with graphical and tabular-based reports.
- » Respond quickly to information requests through scheduled data extraction of medical equipment movement data.
- » Extract preventative maintenance schedules for assets in advance of supplier visits.
- » Improve confidence in data via a holistic approach to data integrity including full auditing functionality.
- » The user is turned into a database administrator without any IT skills required.
- » Data is easily accessed without the need of any IT support.
- » Ad-hoc reporting allows users to design their own reports based on their requirements.
- » Graphical display of data gives an instant response to queries. No more data drilling to get daily checks confirmed!
